

# Bacteria & Fungi Salt

Cure for bacteria and fungal diseases for salt water fish

*Fish victims of a bacterial infection*

## PACKAGING

BOX of 6 Vials (5 Bacteria & Fungi SALT + 1 BioDigest Start)

Useful for a complete treatment of and aquarium between 60 and 180 L and it reseeded.

BACTERIA & FUNGI SALT intended only for the treatment of ornamental saltwater fish. BACTERIA & FUNGI SALT has a wide spectrum of action and treats a large number of diseases caused by bacteria or fungi. At the end of the treatment period, the use of BIODIGEST START vial included in the box allows the regeneration of the biological filtration.

Visible symptoms may be whitish or yellowish secretions, ulcers, skin inflammations, bleeding, scale loss, fin decomposition, bulging eyes, cotton fluff, swollen belly, or unusual oscillatory movements of the fish.

BACTERIA & FUNGI SALT can be used when the diagnosis of the disease is neither possible nor obvious.

At the end of the treatment period, the use of BIODIGEST START allows the regeneration of the biological filtration. BIODIGEST START is made up of natural nitrifying, nitrate reducing and facultative bacterial strains selected for their ability to convert ammonia into nitrites, nitrites into nitrates and nitrates into nitrogen. These bacteria work together with each strain finishing off the work started by the others. Some are capable of biosynthesising nitrate reducing enzymes in aerobic conditions. This enables water to be effectively purified, nitrates and phosphates to be reduced and prevents the spread of filamentous algae. By probiotic effect and food competition, they also fight against the proliferation of pathogens and reduce the risk of unexplained illnesses.

BACTERIA & FUNGI SALT is a drug intended for ornamental fish, it should not be used to fish for human consumption.

Aquarium 60 to 100L	
Day 1	Do not feed the fish <b>Vial A</b>
Day 2	Do not feed the fish <b>Vial B</b>
Day 3	Feed the fish - No treatment
Day 4	Do not feed the fish <b>Vial A</b>
Day 5	Do not feed the fish <b>Vial B</b>
Day 6	Feed the fish - No treatment
Day 7	Do not feed the fish <b>Vial A</b>
Day 8	Feed the fish - No treatment
Day 9	Water change : 50% of the volume Feed the fish - No treatment Add the vial of <b>BioDigest Start</b>

Aquarium 101 to 180L	
Day 1	Do not feed the fish <b>Vials A B at the same time</b>
Day 2	Do not feed the fish <b>Vial A</b>
Day 3	Feed the fish - No treatment
Day 4	Feed the fish - No treatment
Day 5	Feed the fish - No treatment
Day 6	Feed the fish - No treatment
Day 7	Do not feed the fish <b>Vials A B at the same time</b>
Day 8	Feed the fish - No treatment
Day 9	Water change : 30% of the volume Feed the fish - No treatment Add the vial of <b>BioDigest Start</b>
