

# BacterKit Soil

kit d'ensemencement bactérien pour sol d'aquarium

## PACKAGING

Box of 6 vials

BACTER KIT SOIL is a kit to seed an aquarium soil. It contains:

**BACTER SOIL:** includes several strains of living bacteria aimed at colonizing the soil of a new aquarium.

**NUTRI SOIL:** nutriments needed for proper bacterial development.

Carefully selected bacteria of BACTER SOIL will install optimal biological filtration. It is recommended to use BACTER KIT SOIL with AQUAGROWTH SOIL and/or AQUASHRIMP POWDER by Prodigio. BACTER KIT SOIL is also suited for any other soil. Once the aquarium is set up, use START UP.

## DOSAGE

1 box of BacterKit Soil for:  
- **1 AquaGrowth Soil**  
- **1 AquaShrimp Powder**

It is recommended to use BACTER KIT SOIL with AQUAGROWTH Soil and/or AQUASHRIMP POWDER by Prodigio. BACTER KIT SOIL is also suited for any other soil.

*How to use: Pour up to 1 cm of water in the tank, add Bacter Kit Soil, mix it. Add the soil, the plants and the rest of the decor, then more water.*
