

# BioVert

is a nitrate and phosphate-free fertiliser which provides your plants with all the trace elements needed for quick and healthy growth, particularly directly assimilable iron.

**PACKAGING**

- **Nano Range,**  
Aquarium from 0 to 120 l  
(0 to 30 US gal)  
*Blister of 4 vials*
- **Standard Range,**  
Aquarium from 120 to 1 000 l  
(30 to 250 US gal)  
*Box of 6, 30 vials*
- **Pro Range,**  
Aquarium from 1 000 & more  
(250+ US gal)  
*Box of 10 vials*

To sustain healthy plant growth, your aquarium must offer a number of trace elements, including potassium, sulphur, manganese, and most importantly, iron. These elements are constantly replenished by the currents in a natural environment, but they can rapidly become depleted in a closed environment, such as an aquarium.

Healthy growth will be impaired by a shortage of any single trace element, though most critically by a shortage of iron, which is used in the production of chlorophyll, essential for photosynthesis.

Biovert therefore provides all the trace elements you need to ensure healthy plant growth. The iron is directly bio-available and assimilable by the plants (Fe II).

Use Biovert to remedy poor plant growth and yellowing, splitting or transparent foliage in your aquarium.

Bio Vert is nitrate and phosphate-free.

## DOSAGE FOR EACH PRODUCT

- **Nano Range :**  
*1 vial for 60 l (15 US gal) /15 days*
- **Standard Range :**  
*1 vial for 200 l (50 US gal) /15 days*
- **Pro Range :**  
*1 vial for 2 000 l (500 US gal) /15 days*
