

Spots & Velvets Fresh

Cure for velvets and spots diseases for fresh water fish

Fish contaminated by *Oodinium*

Fish contaminated by *Ichthyophthirius*

PACKAGING

BOX of 6 Vials (5 Spots & Velvets FRESH + 1 BioDigest Start)

Useful for a complete treatment of and aquarium between 60 and 180 L and it reseed.

SPOTS & VELVETS FRESH intended only for the treatment of ornamental fish with the so-called «white spots» and «velvet» diseases, mainly caused by *Ichthyophthirius*, *Oodinium* and secondary bacterial infections caused indirectly by these protests. At the end of the treatment period, the use of BIODIGEST START allows the regeneration of the biological filtration.

Visible symptoms are small spots, granular lesions or fluffy layers of pale gray. They appear on the gills, fins and may extend to the whole body. Infected fish fins retract and try to remove the parasites by rubbing against the scenery. Those whose gills are very affected have an abnormally high respiratory activity, become apathetic and lose weight quickly.

At the end of the treatment period, the use of BIODIGEST START allows the regeneration of the biological filtration. BIODIGEST START is made up of natural nitrifying, nitrate reducing and facultative bacterial strains selected for their ability to convert ammonia into nitrites, nitrites into nitrates and nitrates into nitrogen. These bacteria work together with each strain finishing off the work started by the others. Some are capable of biosynthesising nitrate reducing enzymes in aerobic conditions. This enables water to be effectively purified, nitrates and phosphates to be reduced and prevents the spread of filamentous algae. By probiotic effect and food competition, they also fight against the proliferation of pathogens and reduce the risk of unexplained illnesses.

SPOTS & VELVETS FRESH is a drug intended for ornamental fish, it should not be used to fish for human consumption.

Aquarium 60 to 100L	
Day 1	Do not feed the fish Vial A
Day 2	Do not feed the fish Vial A
Day 3	Feed the fish - No treatment
Day 4	Do not feed the fish Vial B
Day 5	Feed the fish - No treatment
Day 6	Do not feed the fish Vial A
Day 7	Do not feed the fish Vial B
Day 8	Feed the fish - No treatment
Day 9	Water change : 50% of the volume Feed the fish - No treatment Add the vial of BioDigest Start

Aquarium 101 to 180L	
Day 1	Do not feed the fish Vials A B together
Day 2	Do not feed the fish Vials A B together
Day 3	Feed the fish - No treatment
Day 4	Feed the fish - No treatment
Day 5	Feed the fish - No treatment
Day 6	Do not feed the fish Vial A
Day 7	Feed the fish - No treatment
Day 8	Feed the fish - No treatment
Day 9	Water change : 30% of the volume Feed the fish - No treatment Add the vial of BioDigest Start
